September 23, 1994

Union Electric Company
ATTN: Mr. Donald F. Schnell
Senior Vice President - Nuclear
Post Office Box 149 - Mail Code 400
St. Louis, MO 63166

Dear Mr. Schnell:

This refers to the routine safety inspection conducted by Mr. B. L. Bartlett, Ms. D. R. Calhoun, and Mr. C. C. Osterholtz of this office, and Mr. L. R. Wharton of the Office of Nuclear Reactor Regulation from July 17 through September 17, 1994, of activities at Callaway Plant, Unit 1, authorized by NRC Operating License NPF-30, and to the discussion of our findings with Mr. J. D. Blosser and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

1001

The inspectors noted several instances of poor housekeeping. While this poor housekeeping would not have damaged any safety related equipment it could have lead to the introduction into the reactor coolant system of some small amount of unwanted material. Your efforts to improve housekeeping have been noted and you are encouraged to continue further improvements.

The licensee's failure to follow a procedure during the sampling of a radioactive waste storage tank was a violation of Technical Specifications. However, this violation will not be cited as the criteria specified in 10 CFR 2, Appendix C, Section VII.B were satisfied.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
