

September 21, 1994

Mr. Bob Leyse
12136 Brookglen Drive
Saratoga, California 95070

Dear Mr. Leyse:

I am responding to your request of May 30, 1994, to Chairman Ivan Selin of the Nuclear Regulatory Commission (NRC) for a copy of a letter report of January 29, 1986, prepared by the Thermal/Hydraulic Analysis Division of Sandia National Laboratories.

In our letter of June 17, 1994 to you, we stated that a non-proprietary version of the report would be sent to you after we made a proprietary determination of the contents of the report. A non-proprietary version of the report has now been developed; a copy of which is enclosed. We are sorry for the delay in providing you this copy. Because the report was identified as proprietary, NRC's handling of it is governed by 10 CFR 2.790, which describes provisions to protect the rights of owners of proprietary information. The NRC process implementing 10 CFR 2.790 requires us to request the owner of the proprietary information to identify which information in the report is proprietary and provide justification of why the information is proprietary. This is accomplished in an affidavit accompanying the report. In this case, the author of the report is not the owner of the proprietary information, and the report was written long ago. Therefore, we sent the report to Westinghouse, the owner of the proprietary information, for the necessary identifications and justifications. Upon receiving the Westinghouse identifications we had to confirm them; and, since the original report was not authored and submitted by Westinghouse, we needed to make a non-proprietary version of the report. We have placed copies of this version in our public document rooms.

I trust that this NRC action is responsive to your request. If you have any questions regarding this report, please contact Frank Orr, of my staff, at 301-504-1815

Sincerely,

Original signed by

William T. Russell, Director
Office of Nuclear Reactor Regulation
