Re: License Application                      Control #113659  
    500 Exchange Street  
    Middlebury, VT 05753

Dear Mr. Roberts:

After discussion with you on January 2, 1991, we find that the Texas Nuclear Model 5176, Serial No. 2386, located at Middlebury, VT facility, does not need a specific license. A general license is all that is required.

We are therefore requesting that you please abandon our application for renewal #12-10308-01. We will therefore operate under a general license for this instrument.

Will you please confirm.

Sincerely,

  
Harold I. Goldsmith, P.E., DEE  
Corporate Radiation Officer
