

United States Nuclear Regulatory Commission  
Office of NRR 12-H5  
Washington, DC 20555

August 10<sup>th</sup> 1994

Dear Anna May Haycraft,

The enclosed letter to Governor Pat Wilson, that he forwarded to the Public Utilities Commission, who at my at my request sent a copy to me.

I was told by phone that you are the only ones who can shut San Onofre Nuclear Plant down and completely dismantle said plant.

San Onofre is the oldest Nuclear Plant and you are well aware of its years of problems. Now we have Terrorist, enclose L.A. Time article, the plant is undefendable!

We can not wait till 1998

Respectfully  
Mr Ted Dougherty

## Nuclear Plants Told to Protect Against Terrorist Bombings

*From Associated Press*

WASHINGTON—Nuclear power plants must install barriers to guard against vehicle bombs like the one that exploded under the World Trade Center, the Nuclear Regulatory Commission has ruled.

The NRC had refused for years to require the anti-terrorist barriers at nuclear plants, but commissioners reconsidered because of the New York City bombing and another bizarre incident, which both happened in February, 1993.

A man driving a station wagon crashed through a fence and a metal garage door at the Three Mile Island nuclear plant in central Pennsylvania. The man, a former mental patient, roamed the plant's turbine building for four hours before he was apprehended. He carried no explosives or weapons.

The nation's nuclear plants have 18 months to comply with the rule issued this week. They may use a variety of barriers, including ditches or walls.

Dear Mr. Dougherty:

This is in response to your telephone conversation with Frank Crua of the Energy Branch staff today. Enclosed is a copy of your letter to us which we answered July 21, 1994 and the address of the NRC:

United States Nuclear Regulatory Commission  
Office of NRR, 12H5  
Washington, DC 20555  
Attention: Anna May Haycraft

It is hoped that this information will assist you.

Sincerely,

*Bill Gaffney*

Governor Pete Wilson -  
State Capitol  
Sacramento, California 95814  
MAY 31 PM 1:52  
May 26<sup>TH</sup>, 1994

Governor Wilson Sir;

The enclosed article on the San Onofre Nuclear Plant shows that Southern California Edison is going to fight tooth and toe nail to keep the Nuclear Plant on line. Governor, you Sir are going to have to take the bull by the horns and shut the complete plant down now and dis matle.

Governor we are in an earth quake frenzy and Sir I emphases the word frenzy. The whole area of southern California is envelopeed in a short span

of time with earth quakes, Whittier, Lander's  
and Northridge.

San Onofre is vulnerable not only  
from a deep Ocean quake, but from a  
whip lash from an eight plus on the Newport  
Inglewood Fault. I know Sir, San Onofre  
Nuclear Plant has all kinds of safety controls.  
But like Chernobyl humanis paniche  
and that's all we need is a melt down, after  
an earthquake like the forgoing.

In regards to the Newport, Inglewood  
Fault. There will be first a magnitude six  
that will in compass metropolitan Los Angeles  
all the way down to the harbor. It will

not be felt in the San Fernando Valley,  
San Gabriel Valley or Orange County east  
of the Whittier fault line. There will be a  
twelve to twenty four hour time span  
to evacuate Metropolitan Los Angeles and  
all beach cities all the way down to Laguna.

It will not be the eight plus quake  
that will destroy this area, this is just the  
trigger mechanism! For man has with  
drawn most of the oil from Venice beach  
through west Los Angeles down to Huntington  
beach. He has replace the oil with sea  
water, than on top he has put Ton's and  
Ton's of steel and Ton's and Ton's of Concrete.

Liquefaction now comes into play  
and as Venice Beach, Culver City and the  
Baldwin Hills collapse the Santa Monica Bay  
surges east ward. At the same time  
Huntington Beach to Long Beach collapses  
and the Pacific Ocean surges north. They  
will meet about Paramount and seeing as  
how the Long Beach break water is slowing the  
Pacific Ocean north ward surge. The  
Santa Monica Bay and all the Ocean water will  
flow south ward's setting up a whirlpool  
around Palos Verdes!

to

When all is still Palos Verdes will  
be an Island. The coast line will run

from the Pacific Palisade along Santa Monica  
Blvd. to where it meets Sunset Blvd. At that  
point you draw a line south east to where  
the 405 and the 55 meet about Mac Arthur Blvd  
and that line is the new coast line for now.

Governor Wilson, I enclose two letters  
to President Nixon, God rest his soul, that  
emphasize what I stated that did come to  
pass. Were I to remain silence three  
to four million souls would perish! As  
God is my witness I have done my duty.

Respectfully  
Mr Ted Dougherty

my poem is for your wife and you

## *A Wandering Soul*

*As a body I have a mind,  
As a mind I have a soul,  
As a soul I have identity,  
But who am I?*

*I came from not in search of identity  
and all I found was serenity,  
I came from not in search of benevolence  
and all I found was malice,  
I came from not an inquiring mind  
and all I found was it was not mine,  
But who am I?*

*Am I but Pandora's box full of thought all for not,  
Am I but the figment of my own imagination,  
Am I but the body of a wandering soul,  
Who but am I.*

*I am love, truth, sincerity,  
I am the chemistry composite of space and time,  
I am the soul of the Universe,  
I am I.*

President Richard M. Nixon  
Dear Mr. President;

A hardy "Well Done" on your bold leadership in taking the economy in hand. It was a difficult decision; but you handel it with finesse.

You now have before you the problem of canceling or postponing "Cannikin" may I as a layman offer a few thoughts and theories on the subject.

The prevailing theory today that small nuclear under ground explosion will relieve the earths fault buildup I think this has been disprove. The French nuclear testing in the South Pacific this year is a classic example. Every time a nuclear device was detonated a quake of large magnitude followed in either in the South Pacific or South America. This resulted in the French cancelation of the test. Going a step further on a World wide panorama we find when Russia conducts nuclear under ground tests Turkey and Iran are on the receiving end. The same is true of China with the devastation of the Himolayas. Just three weeks ago a nuclear test was resume in Nevada and a day later San Fernando had a small quake. All this support the theory that; the shock waves of nuclear test, (depending on the size and shape) are bouncing off the earth core resulting in volcanoe type quakes. This alone would justify canceling Cannikin, but their are three other other problem that could possible be even more catastrophic. We are in peak of the seven year wobble cycle coupled with the fact Pacific Botton is sliding north ward all this in relation to the test sight is kind a frightening. Add to this the fall out, what more can I say..

On the Positive side this is a goldden opportunity to come before World and offer a control plan for nuclear testing. THE time is past when each nation can do its own thing. The family of nations must come together for mankinds sake.

THE WHITE HOUSE

WASHINGTON

September 18, 1971

Dear Mr. Dougherty:

On behalf of the President, I want to thank you for your recent letter about the proposed underground nuclear test at Amchitka, Alaska. As you perhaps know, this matter will be thoroughly reviewed by the President before a final decision is reached, and you may be certain he will give his most careful attention to all aspects of the test, including environmental and national security considerations.

With best wishes,

Sincerely,

Michael B. Smith  
Staff Assistant

President Richard M. Nixon

Dear Mr. President;

As of this post Cassinini is still go? In my previous letter I made a plea for its cancellation on a scientific plain. I now take a metaphysical position.

In close is a copy of a letter to President Kennedy and also a newspaper report. I think Buddha answered my prayers!.

Therefore I humbly, humbly ask you in the name of the Lord thy God to cancel Cassinini. Be a man of peace, go before the World and seek a world wide moratorium on nuclear testing.

May God guide you

Sincerely

Ted Dougherty
