The Commission has issued the enclosed exemption to the schedular requirement of 10 CFR Part 50.49 for the Big Rock Point in response to your letter dated March 18, 1983. This exemption is being forwarded to the Office of the Federal Register for publication. The exemption grants your request to delay the deadline for submittal of information on environmental qualification of electrical equipment important to safety from May 20, 1983 as stated in 10 CFR Part 50.49(g) to June 1, 1983.

We have determined that granting of the exemption does not involve a significant increase in the probability or consequences of an accident previously evaluated, does not create the possibility of an accident of a type different from any evaluated previously, does not involve a significant reduction in a margin of safety, and therefore does not involve a significant hazards consideration. We have also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by this action, the activities will be conducted in compliance with the Commission's regulations and that the issuance of this exemption will not be inimical to the common defense and security or to the health and safety of the public.

Sincerely,

Original signed by  
Walter A. Paulson
