

MAY 22 1991

MEMORANDUM FOR: Vandy L. Miller, Assistant Director
State Agreements Program
Division of State Programs
Office of Governmental and Public Affairs

FROM: Paul H. Lohaus, Chief
Low-Level Waste Management Branch
Division of Low-Level Waste Management
and Decommissioning, NMSS

SUBJECT: TRANSMITTALS ON US ECOLOGY TOPICAL REPORT ON HIGH STRENGTH
ASPHALT (WM-102)

The enclosed documents relative to the review efforts on the U.S. Ecology topical report on High Strength Asphalt Solidification for Radioactive Waste were recently issued. The first document summarizes the meeting that was held on May 8, 1991, and the second document is an NRC letter to the vendor, U.S. Ecology, responding to a request for interim approval for the boric acid waste formulation. The interim approval will be granted for the boric acid waste stream formulation under very specific narrowly bounded conditions. The documents should be forwarded to the three currently sited Agreement States for their information.

If you have any questions, please contact Robert Shewmaker at 20596.

Paul H. Lohaus, Chief
Low-Level Waste Management Branch
Division of Low-Level Waste Management
and Decommissioning, NMSS
