Docket No. ~~72-009~~ 50-267

SUBJECT: Security Plan for Proposed Independent Spent Fuel Storage
Installation (ISFSI)

REFERENCE: 1) PSC letter, Crawford to Roberts, dated June 22, 1990
(P-90173)

2) PSC letter, Crawford to Gaskins, dated March 11, 1991
(P-91091)

Dear Mr. Gaskins:

Public Service Company of Colorado (PSC) has submitted an application to license and construct an Independent Spent Fuel Storage Installation (ISFSI) to store spent fuel from the Fort St. Vrain Nuclear Generating Station (Reference 1). In Reference 2, PSC submitted a revised Physical Security Plan, for the proposed ISFSI. PSC has further revised this plan to incorporate clarifications suggested by Mr. Charles Gaskins during telephone discussions in May 1991.

This letter submits, for staff review, the ISFSI Physical Security Plan (Attachment 1) which implements those requirements that PSC believes are applicable to an ISFSI and which incorporates Mr. Gaskin's comments. This revised plan includes more detailed information concerning searches, the alarm system, and security procedures to be implemented during ISFSI loading. This submittal supercedes the plan submitted in Reference 2 which is hereby withdrawn.
