License No. 21-19874-01

Gentlemen:

This refers to the special safety inspection conducted by Ms. E. Matson and Mr. J. R. Mullauer of this office on August 24, 1982, of activities authorized by NRC Byproduct Material License No. 21-19874-01 and to the discussion of our findings with you and Carolyn Bindon at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

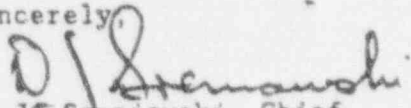

In addition to the above areas, the inspectors examined actions described in your letter dated January 25, 1982, regarding apparent items of noncompliance found during our November 4, 1981 inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as specified in the enclosed Appendix. A written response is required.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. J. Sreniawski, Chief
Materials Radiation Protection
