Subject: Arkansas Nuclear One - Unit 2  
Docket No. 50-368  
License No. NPF-6  
Additional Information Concerning the  
Proposed Change to the Technical Specification  
Pressure/Temperature Limits

Gentlemen:

In letter 2CAN069109, dated June 18, 1991, Entergy Operations submitted a Technical Specification change request for Arkansas Nuclear One, Unit 2 (ANO-2). The change request was to revise the pressure/temperature operational limits through 21 effective full power years. As part of that submittal, ANO also provided a discussion of the effect on the Pressurized Thermal Shock analysis as part of the pressure/temperature limits submittal.

On July 8, 1991, ANO received a telephone request from the ANO-2 NRR Project Manager concerning the unirradiated upper shelf energy value for six longitudinal welds, 2-203 A, B, and C and 3-203 A, B, and C. This information was originally provided to the Staff in letter 2CAN067810, dated June 13, 1978, and is repeated below for ease of reference.

The unirradiated upper shelf energy for these welds is:

<u>WELD NUMBER</u>	<u>UPPER SHELF ENERGY (FT-LB)</u>
2-203 A	109
2-203 B	109
2-203 C	109
3-203 A	122
3-203 B	122
3-203 C	122
