Dear Chairman Palladino:

On January 27, 1983, our former Chairman, Mr. Heyward Shealy, sent you a letter expressing the concern of the Conference regarding the proposed amendment to 10 CFR 20 for dosimetry processors to be accredited through the National Bureau of Standards accreditation program. A copy of Mr. Shealy's letter is enclosed.

On February 15, 1983, Mr. Minogue responded to Mr. Shealy's January 27 letter advising that the Commission would soon be considering the possible amendment of 10 CFR 20 relative to the dosimetry accreditation requirement. Mr. Minogue further indicated that he would keep the Conference advised of developments on this proposal. Since February 15, no further correspondence has been received regarding any action of the Commission on this issue.

The Conference continues to express the desire that the Commission take a positive position on this matter, and should a hearing on this subject be held in the future, we would like to have the opportunity to testify.

I would very much appreciate receiving an update status on the above issue with advisement of any future hearings that may be planned.

Yours very truly,

*Albert J. Hazle*
