

JAN 30 1992

MEMORANDUM FOR: Lawrence E. Kokajko, Project Manager
 Project Directorate V
 Division of Reactor Projects III, IV, V

FROM: James T. Wiggins, Acting Chief
 Materials and Chemical Engineering Branch
 Division of Engineering Technology

SUBJECT: SAFETY EVALUATION, LICENSE CHANGE APPLICATION 219
 CONCERNING SG TUBE REPAIR LIMITS AND SG LEAK RATE LIMITS

Plant Name: Trojan
 Utility: Portland General Electric Company
 Docket No.: 50-344
 TAC No.: M82287
 Lic. Status: OL
 Responsible PD: V
 Reviewer Branch: EMCB
 Review Status: Complete

The Materials and Chemical Engineering Branch of the Division of Engineering Technology has completed its review of License Change Application (LCA) 219 which was submitted by Portland General Electric Company on December 15, 1991. LCA 219 involves proposed changes to the Trojan Technical Specifications regarding steam generator tube repair limits and primary-to-secondary leakage limits.

The staff has reviewed these proposed changes and finds them to be acceptable. Our safety evaluation is attached. We will provide SALP input by February 7, 1992.

Original Signed by

James T. Wiggins, Acting Chief
 Materials and Chemical Engineering Branch
 Division of Engineering Technology
