U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289  
Restart Milestone Schedule

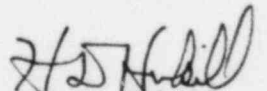

This letter is in response to your letter dated June 8, 1983 which requested schedular information concerning restart of TMI-1.

The enclosed schedule provides the current dates for the beginning and end of Hot Functional Testing (HFT), Zero Power Physics Testing (ZPT) and Power Escalation Testing (PET). In addition, the enclosed figures describe the current scope of these activities.

It should be noted that any restart prerequisites outside the scope of the HFT, ZPT and PET activities are currently scheduled to be complete by the end of June, 1983. Therefore, these items do not have an impact on the HFT, ZPT or PET dates.

As you requested we will keep you apprised of any significant (greater than two weeks) changes in the HFT, ZPT and PET dates through the TMI-1 NRC Project Manager.

Sincerely,

  
H. D. Hukill  
Director, TMI-1
