March 7, 1960

Mr. Carl M. Bunker  
Geophysicist  
United States Department  
of The Interior  
Geological Survey  
Federal Center  
Denver 2, Colorado

Dear Mr. Bunker:

Enclosed are application forms, instructions, and regulations pertinent to the licensing of byproduct material (reactor-produced radioisotopes). You will note that radiological safety officers are not specifically licensed, but that the duties and qualifications of a person designated as radiological safety officer may be considered in conjunction with an application for a specific license.

In the event that the Department of The Interior submits application for byproduct material license for a radioisotope source to be used in a sample-irradiation facility, the facility description and handling procedures must be a part of that application.

Very truly yours,

Robert E. Brinkman  
Senior Licensing Reviewer  
Isotopes Branch  
Division of Licensing and Regulation
