Virginia Electric and Power Company
North Anna 1 and 2

Docket Nos.: 50-338, 50-339
License Nos.: NPF-4, NPF-7

During an NRC Inspection conducted on August 21 through September 17, 1994, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

Unit 1 License Condition 2.D.(3).u and Unit 2 License Condition 2.C.(23) require that the licensee implement and maintain in effect all provisions of the approved fire protection program as described in the Final Safety Analysis Report for the facility and as approved in the Safety Evaluation Report dated February 1979. The North Anna Updated Final Safety Analysis Report, Section 9.5.1.6.3, states that the penetration fire barriers are subject to periodic inspections and defines fire barrier penetrations to include fire dampers.

Contrary to the above, from June 28, 1991, to August 25, 1994, no fire damper inspections were performed.

This is a Severity Level IV Violation (Supplement I).

Pursuant to the provisions of 10 CFR 2.201, Virginia Electric and Power Company is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). If an adequate reply is not received within the time specified in this Notice, an order or demand for information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.
