SUBJECT: CORRECTED COPY, AMENDMENT 10

Enclosed is a corrected copy of your NRC license.

This corrected copy was issued to correct an oversight in License Condition 11. In particular, leak tests are not required on your 10 microcurie Cesium-137 source used in your dosimeter calibrator.

As your license was not in our computerized system, and as some wording and format changes have occurred since your license was issued, minor changes have been made to your license in accordance with current policies.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify us so that we can provide appropriate corrections and answers.

Any future correspondence relating to your license should specifically reference your license and docket numbers to expedite your inquiry.

Sincerely,

Beth A. Prange
