Docket No. 50-254

Mr. Dennis L. Farrar
 Director of Nuclear Licensing
 Commonwealth Edison Company
 P. O. Box 767
 Chicago, Illinois 60690

Dear Mr. Farrar:

Re: Quad Cities Nuclear Power Station, Unit 1

The Commission has issued the enclosed Order modifying the Order dated January 13, 1981, as revised by Order dated January 19, 1982 for the Quad Cities Nuclear Power Station, Unit 1. This Order continues in effect the exemption and extends the completion date for installation of plant modifications needed to comply with the staff's Acceptance Criteria contained in Appendix A to NUREG-0661 to not later than startup after the spring 1984 refueling outage.

In accordance with your request made by letter dated June 15, 1983 and supplemented by your letter of June 22, 1983, this extension is granted to provide additional time to complete modifications that will completely restore the margin of safety consistent with the staff's Acceptance Criteria of NUREG-0661.

The issuance of this modifying Order provides an extension of the exemption from General Design Criterion 50 of Appendix A to 10 CFR Part 50 previously granted to the affected licensee on January 13, 1981, as modified by Order dated January 19, 1982.

A copy of the enclosed Order is being filed with the Office of the Federal Register for publication.

Sincerely,

Domenic B. Vassallo, Chief
 Operating Reactors Branch #2
 Division of Licensing
