Subject: Comments on Docket No. PRM-150-3

Dear Sirs:

A petition for rulemaking was filed by Measurex Corporation and published in the Federal Register on Wednesday, October 5, 1994, page 50706. This is identified as Docket No. PRM-150-3 and relates to desired changes in 10 CFR Parts 2 and 150.

We strongly endorse this petition for rulemaking, as presented in the Federal Register, to:

- (1) require Agreement States to notify the NRC of all proposed and completed regulatory actions, and
- (2) require the NRC to publish Agreement State notices of proposed and completed rulemaking.

We are a major manufacturer, distributor, and supplier of services for industrial process measurement and control systems used by NRC and Agreement State licensees throughout the USA. We continually experience the problems identified by this petitioner. The proposed rulemaking would help identify potential changes in Agreement State regulations that affect us and our customers in those agreement states. Such notification would hopefully alert the NRC to possible rule inconsistencies and non-compatibility problems before changes are finalized. It would provide notification for all licensees to facilitate the opportunity to participate in the rulemaking process by working directly with the responsible Agreement State authorities. And, it would improve awareness, communications and understanding of new Agreement State regulations. Implementing the rulemaking in this petition would have a positive benefit for all involved.

Again, we strongly endorse this petition for rulemaking.

Sincerely,

John R. Dukes, Manager  
Nucleonics and Radiological Operations
