EDWIN I. HATCH NUCLEAR PLANT UNITS 1 AND 2
SUPPLEMENT TO RESPONSE TO GENERIC LETTER 82-33

Gentlemen:

Pursuant to telephone conversations between my staff and Mr. George Rivenbark, NRC Hatch Licensing Project Manager, we hereby clarify our position regarding a schedule for implementation of the guidance of Regulatory Guide 1.97-Revision 2.

Our response dated April 15, 1983, to Generic Letter 82-33 stated that an evaluation would be performed and a report prepared to compare existing or planned Plant Hatch information systems with the criteria provided by Regulatory Guide 1.97-Revision 2. Detailed justifications and/or planned enhancements will be discussed regarding deviations from the criteria of the Regulatory Guide. That report is scheduled to be sent to the NRC in February 1984, as noted in our earlier response.

Our April 15, 1983, response did not, however, provide a schedule for the actual implementation of any enhancements which may be determined to be necessary. An engineering evaluation is required to define the scope of any such possible plant modifications. A detailed schedule will be developed in conjunction with the evaluation as required by NUREG 0737 Supplement 1. This implementation schedule will be included in our February 1984 report submittal.

Please contact this office if you have any further questions.

Very Truly Yours,

J. T. Beckham, Jr.

PLS/blm
