Dear Dr. Verani:

This is a summary of our telephone conversation in reference to your letter dated September 22, 1994.

As I explained to you over the phone, Texas is an Agreement State. In that, NRC does not regulate the use of byproduct material in Agreement States. No "personal" licenses are issued either by NRC or the Agreement States. The license is issued to a facility and the individual(s) are named as authorized users.

For your convenience we are providing you the address and telephone number of the Texas Bureau of Radiation Control.
