SUBJECT: ROUTINE INSPECTION NO. 030-06929/94-001

Dear Mr. Kaese:

This letter refers to your staffs October 21, 1994 correspondence.

You informed us of the delay in installing the independent backup control system and the date of installation of the heat and smoke detectors, however Mr. Nessler did not mention a date by which the independent backup access control system would be operational. As you are aware these systems were required to be operational by July 1993. Please inform us of the date when the independent backup access control system will be operational.

Your cooperation with us is appreciated.

Sincerely,

Walter J. Pasciak, Chief
Industrial Applications Section
Division of Radiation Safety
and Safeguards
