Re: Contract NRC-05-83-218 "Information Management
System for NRC Operations Center"

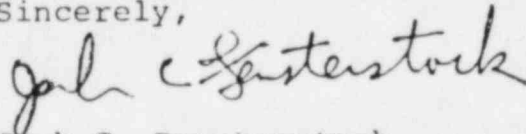

Dear Mr. Hagan:

This letter presents clarifying information to our proposal of 8 June 1983 to provide training and hands-on experience for an NRC Systems Manager for the Information Management System. Page 2 of the letter listed three training methods and page 1 the requisite knowledge areas. In addition, the Optional Form 60 presented labor hours by Phoenix manpower categories. We had not presented the labor breakdown by training method as we were not aware that it was required.

For completeness sake, the attachment presents the above labor breakdown.

We appreciate your cooperation.

Sincerely,

Jack C. Fensterstock
President
