

NOTICE OF VIOLATION

ABB Service Company
Cleveland, Ohio

Docket No. 99901281
Report No. 94 01

During an NRC Inspection conducted on September 22-23, 1994, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1992), the violation is listed below:

Section 21.51, "Maintenance and inspection of records" of Title 10 of the Code of Federal Regulations (10 CFR Part 21) requires (a) each individual, corporation, partnership, or other entity subject to the regulations in 10 CFR Part 21 to prepare and maintain records necessary to accomplish the purposes of 10 CFR Part 21, specifically (1) to retain evaluations of all deviations and failures to comply for a minimum of five years after the date of evaluation.

Contrary to Section 21.51, as of September 23, 1994, ABB did not document its evaluations of deviations and failures to comply and maintain them to allow representatives of the commission to inspect those records to ensure compliance. Specifically, there were no records of evaluations for two potential deviations regarding hardened grease in circuit breakers and bypassing of the "On-Off" charging motor switch in 5HK type circuit breakers.
