Division of Radiation Safety and Safeguards

6/5/91
Date Signed

SUMMARY

Scope:

This routine, unannounced inspection was conducted in the areas of Management Support, Testing and Maintenance, Protected Area Barriers, Assessment Aids, Access Control - Vehicles, Detection Aids - Protected Area, Alarm Stations, Training and Qualification, and Safeguards Contingency Plans.

Results:

In the areas inspected, violations or deviations were not identified.

It was noted that the licensee had taken action to correct items identified during the Regulatory Effectiveness Review. Additionally, as a proactive measure the licensee had taken aggressive action to prevent masking and eliminate CCTV concerns noted during previous inspections. The training provided to the security officers exceeded the regulatory requirements, and provided for a better trained force during emergency contingencies.
