Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of) Docket No. 50-327
Tennessee Valley Authority) 50-328

The application to amend the Sequoyah Nuclear Plant unit 2 operating license, DPR-79, for cycle 2 operations was submitted to the NRC by the July 1, 1983 letter from L. M. Mills to you. As a result of the recent trip of unit 2 on July 18, 1983, the decision was made to start the refueling outage for unit 2 as of July 19, 1983. Currently, a 74-day outage is planned with a subsequent scheduled startup date of October 1, 1983. Our previous scheduled shutdown date was targeted for August 5, 1983.

We therefore request the NRC to support this schedule by the timely review of the various submittals made by TVA for support of the Sequoyah Nuclear Plant unit 2 operations. Failure to properly support this schedule could result in the delay of the startup from refueling.

If you have any questions concerning this matter, please get in touch with J. E. Wills at FTS 858-2683.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
