Docket No. 50-334, License No. DPR-66
SLCRS Safety Evaluation Report

Gentlemen:

Based upon our continuing review of the Updated FSAR for Beaver Valley Unit 1, we have determined that the Updated FSAR does not fully reflect the existing arrangement of the Supplementary Leak Collection and Release System (SLCRS) as described therein. We have reviewed the original Staff Safety Evaluation Report related to the SLCRS and we have concluded that the existing SLCRS arrangement does not invalidate the assumptions or bases of the Staff SER and, therefore, we do not believe an unreviewed safety question exists. We will conduct such additional studies as are necessary to develop appropriate revised pages for the Updated FSAR.

Very truly yours,

J. J. Carey
Vice President, Nuclear
