

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555

OFFICE OF THE  
COMMISSIONER

February 2, 1983

MEMORANDUM FOR THE ACTING GENERAL COUNSEL

SUBJECT: THREE MILE ISLAND UNIT 1

Please prepare a written analysis of the transcripts of the lawsuit between GPU and B&W, giving particular attention to information which could affect the Commission's decision on whether to allow Three Mile Island Unit 1 to resume operation. I am especially interested in information about:

- (1) GPU's falsification of leak rate calculations;
- (2) the flow of information on March 28, 1979;
- (3) cheating on the NRC and Company administered operator examinations; and,
- (4) maintenance at Three Mile Island.

As a separate and less urgent matter, I would like a written analysis of the effect which the settlement between GPU and B&W may have on GPU's pending \$4 billion claim against the NRC.
