

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 25, 2020

MEMORANDUM TO: Michael T. Markley, Chief
Plant Licensing Branch 2-1
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

FROM: G. Edward Miller, Project Manager */RA/*
Special Projects and Process Branch
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MARCH 11, 2020, PUBLIC MEETING WITH
NUCLEAR ENERGY INSTITUTE REGARDING REVISION TO
TSTF-505 LICENSE CONDITION

On March 11, 2020, the U.S. Nuclear Regulatory Commission (NRC) staff held a public teleconference¹ with representatives from the Nuclear Energy Institute (NEI) and others. The purpose of the meeting was to discuss the proposed revision of a Technical Specification (TS) administrative controls program for Technical Specification Task Force Traveler 505 (TSTF-505) that is proposed to be a component of implementing newly developed probabilistic risk assessment (PRA) methods². A current draft of TSTF-579, which would provide a model of application for the TS changes was provided by the Technical Specification Task Force (TSTF).³

At the start of the meeting, the NRC staff reinforced that work on the TS changes was preliminary and should not be interpreted as a formal agency decision to allow licensee control of implementation of newly developed PRA methods.

There was general alignment about the intent of the control program, and comments were focused on best practices for writing TS requirements. A member of the TSTF volunteered to provide edits that reflect application of these best practices after the meeting.

Subsequent to the meeting, a member of the TSTF provided an unofficial mark-up of the TS administrative control program that attempted to address some of the points raised at the meeting⁴ that discussed how the revision to Regulatory Guide 1.200 (RG 1.200) would support efforts to establish the framework for implementation, and oversight of a change control process for newly developed PRA methods.

¹ The original meeting notice is available in the Agencywide Documents Access and Management System (ADAMS) under Accession No. ML20059M645.

² The draft TS changes available under ADAMS Accession No. ML20071D103.

³ The draft TSTF-579 is available under ADAMS Accession No. ML20071G283

⁴ The marked up TS changes are available under ADAMS Accession No, ML20071G323.

No regulatory decisions were made in the meeting.

Following the discussion, an opportunity was afforded to any other participants who wished to ask questions or make comments. No questions or comments were received from the public.
