Docket No. 030-32290/91-01
License No. IDA-266

Eastern Idaho Regional Medical Center
ATTN: P. Winton
Chief Operating Officer
P.O. Box 2077
Idaho Falls, Idaho 83403-2077

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 030-32290/91-01

This refers to the routine, unannounced radiation safety inspection conducted by Mr. R. Brown of this office on July 22, 1991, of the activities authorized by NRC Byproduct Material License No. IDA-266, and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

On April 26, 1991, NRC assumed regulatory authority over the use of licensed material in the state of Idaho. In that violations of Idaho regulations occurring prior to April 26, 1991, will not be cited by NRC, this inspection was limited in scope. However, as an NRC licensee, you are now subject to NRC regulations and in the near future your current license will be converted to adapt NRC standards. It may be to your advantage to review your current procedures and initiate changes as you believe appropriate in preparation for resubmission of your license application.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

No violations or deviations were identified, thus no response to this letter is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.
