July 21, 1983

Mr. John T. Collins
Regional Administrator
U.S. Nuclear Regulatory Commission
Region IV
611 Ryan Plaza Drive Suite 1000
Arlington, Texas 76011

Dear Mr. Collins:

I would like to offer comments to the technical review and recommendations made by Mr. Ralph Heyer last March.

A. Administrative procedures. Some of the administrative procedures suggested by Mr. Heyer are in the general division and department administrative procedures and will be pulled out and placed in a separate readily available manual. We also use NRC guides for licensing and compliance activities which will also be placed in the manual.

I have also inquired to several other agreement states for suggestions. A manual should be available by this fall.

B. Mr. Boschult (Sr. Radiation Physicist) attended the radiography class in November, 1981. He has not attended the medical or well logging courses. We will make application for the medical course when schedules are available.

C. We will be developing guidelines for inspection write ups to be incorporated into the procedures manual. We would appreciate copies of write ups you may use in your office that would be applicable to our one man licensing staff.

Hopefully this will meet the recommendations.

Thank you.

Robert D. Funderburg, Manager
Radiation Control Section
