Mr. Shelby T. Brewer, President  
ABB Combustion Engineering Nuclear Power  
Combustion Engineering, Inc.  
1000 Prospect Hill Road  
P.O. Box 500  
Windsor, Connecticut 06095-0500

Dear Mr. Brewer:

We were pleased to receive your July 22 letter giving the news that you had signed contracts to supply two more 1000 Mwe System 80 units to Korea. Congratulations on this important sale. Korea's decision indicates a high degree of confidence in your company and the technology incorporated in the System 80 design.

We will be glad to work with you and the Korean government, to the extent our statutory responsibilities allow, as this project moves forward. We have a very good relationship with Korea's nuclear energy organizations and consult with them frequently on various safety, regulatory and export-related matters.

Sincerely,

  
Ivan Selin
