GEORGE C. CREEL  
VICE PRESIDENT  
NUCLEAR ENERGY  
(301) 260-4455

August 19, 1991

U. S. Nuclear Regulatory Commission  
Washington, DC 20555

ATTENTION: Document Control Desk

SUBJECT: Calvert Cliffs Nuclear Power Plant  
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318  
Revision 2 to Calvert Cliffs Fitness for Duty Manual

REFERENCE: (a) Letter from Mr. G. D. Schwartz, Jr. (BG&E) to NRC Document Control Desk, dated February 20, 1991, NRC Inspection Report Nos. 50-317/90-30 and 50-318/90-30 (October 30, 1990 to November 1, 1990)

Gentlemen:

In Reference (a) we responded to NRC Inspection Report No. 90-30 which noted certain discrepancies in our Fitness for Duty (FFD) Program for Calvert Cliffs. These discrepancies involved failure to produce written procedures that required FFD training and retraining for contractor/vendor supervisors. Additionally, documentation was not available to provide evidence that contractor/vendor supervisors had received the required training within three months after initial supervisory assignment. Reference (a) described our plans for resolving these concerns. The purpose of this letter is to inform you that we have completed these corrective actions. The FFD Manual has been revised accordingly, a copy of which is enclosed for your information.

Should you have any further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

GCC/BSM/JAH/dlm

Enclosure
