Docket Nos. 50-514
and 50-515

R. J. ...

Portland General Electric Company
ATTN: Mr. Bart D. Withers
Vice President Nuclear
131 S.W. Salmon Street
Portland, Oregon 97204

Gentlemen:

On November 12, 1982, Portland General Electric Company withdrew the construction permit application for Pebble Springs 1 & 2.

Under 10 CFR Part 170, the Commission recovers review costs using the procedures of Footnote 3 to 10 CFR 170.21 when the review of the project is complete. The review of this project was completed as of February 24, 1983, the date that the Atomic Safety and Licensing Board Panel dismissed the proceeding. Accordingly, we have determined the actual expenditures incurred for professional staff-hours and contractual support services costs from the date the application was filed to its date of withdrawal. Full costs for Unit 1 were \$814,935 and \$172,477 for Unit 2. Under the Commission's regulations, we limit the charge for review to that which would be applied to the construction permit under 10 CFR 170.21 A.1, that is, \$814,935 for Unit 1 and \$172,477 for Unit 2. Since \$125,000 has already been paid as an application fee, the balance due for the review of the construction permit application is as follows:

Unit 1	Full Cost	\$814,935
Unit 2	Maximum Fee	172,477
	Subtotal	<u>\$987,411</u>
	Less: Application Fee	<u>-125,000</u>
	Balance Due NRC	<u>\$862,412</u>

We have notified the NRC's Division of Accounting and Finance to issue an invoice to Portland General Electric Company to cover the Commission's review costs for the withdrawn construction permit application.

Sincerely,

Signed, B. James HoHoway, Jr.
