50-424, Readiness Review Program, GN-424 C  
October 3, 1984

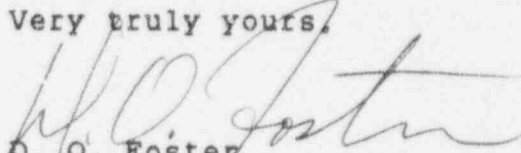

Attention: Mr. J. Nelson Grace

Please find attached Module 18C of the Vogtle Unit 1 Readiness Review Program, entitled Diesel Generators. This document is provided for information only and does not require review and approval by the NRC.

Based on the commitment verification results in this module, and reviews conducted in other referenced modules (e.g., Module 4, Mechanical Equipment and Piping), I am of the opinion that adequate controls exist to ensure the quality of work and the implementation of specific FSAR commitments within the scope of the module. Moreover, none of the findings identified, either individually or collectively, are such that the adequacy of the project diesel generators and auxiliaries is called into question.

This submittal contains no proprietary information and may be placed in the NRC Public Document Room.

Very truly yours,

  
D. O. Foster
