UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555
December 10, 1990

William McDaniel
Facility Manager
Amersham Corporation
40 North Avenue
Burlington, Massachusetts 01803

Dear Mr. McDaniel:

Based on the information and test data submitted in your application dated November 30, 1989, and subsequent letters (see reference section in registration sheet) with enclosures thereto, we conclude that Model 660 System is approved for specific licensing purposes in accordance with the conditions of the enclosed registration certificate. Also, we continue to conclude that Model 660, and 660 E radiography cameras are approved for specific licensing purposes in accordance with the conditions of the enclosed registration certificate.

Since the 918 Series is only registered to contain 20 curies of Ytterbium-169, this registration sheet only allows 20 curies of Ytterbium-169 to be used in the cameras.

Please read over the registration certificate in its entirety and notify us immediately if there are any errors.

We appreciate the comments provided by Lori Podolak on the draft registration sheet.

If you have any questions, please contact me at (301) 492-0511, or Steven Baggett at (301) 492-0542.

Sincerely,

Thomas W. Rich
