A Unit of Getty Oil Company

U. S. Nuclear Regulatory Commission
Washington, DC 20555

Gentlemen:

In accordance with the requirements of paragraph 40.65, 10 CFR 40, Petrotomics Company, holder of Source Material License No. SUA-551, wishes to report that no radionuclide liquid effluents were released to unrestricted areas during the six months prior to July 1, 1983.

Particulate in the form of stack gases have been released to unrestricted areas in the following amounts:

Uranium as U ₃ O ₈	2.24	mCi
Radium-226	9.86 ± 2.95	uCi
Thorium-230	8.82 ± 1.70	uCi
Radon-222	8.86 ± 1.42	mCi
Lead-210	12.24 ± 14.50	uCi

The reported release amounts may be higher than actual release amounts due to the trapping of some of the particulate in a silencer mounted on the dryer scrubber stack.

Sincerely,

Stephen J. Pfaff
Radiation Coordinator
