Docket No. 50-483

Union Electric Company  
ATTN: Mr. Donald F. Schnell  
Vice President - Nuclear  
Post Office Box 149 - Mail Code 400  
St. Louis, MO 63166

Gentlemen:

This refers to the routine safety inspection conducted by me and Mr. T. J. Ploski of this office on August 30, 1983, of activities at the Callaway Nuclear Power Plant, Unit 1, authorized by NRC Construction Permit No. CPPR-139, and to the discussion of our findings with Messrs. D. Schnell and S. Miltenberger and others at the conclusion of the inspection.

The purpose of this inspection was to determine, based on discussions with your staff and our observations, your readiness for a preoperational Emergency Preparedness Appraisal. We believe that the two week period beginning January 9, 1984 is an appropriate time for this appraisal provided that current schedules for equipment installation, procedure completion, and associated training are met. We have agreed to provide your staff with comments on your emergency plan implementing procedures and related chemistry and health physics procedures, which your staff indicated would be provided by October, 1983.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure(s) will be placed in the NRC Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1). If we do not hear from you in this regard within the specified periods noted above, a copy of this letter and the enclosed inspection report will be placed in the Public Document Room.

IE:06  
1/1

SEP 13 1983

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

C. J. Paperiello, Chief  
Emergency Preparedness and  
Radiological Safety Branch
