Attention: Mr. S. Dembek

Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION
DOCKET NO. 50/395
OPERATING LICENSE NO. NPF-12
TECHNICAL SPECIFICATION CHANGE - TSP 940004, SUPPLEMENT 1
RELOCATION OF SEISMIC MONITORING INSTRUMENTATION FROM
TECHNICAL SPECIFICATIONS

Reference: John L. Skold's to G. F. Wunder Letter dated October 17, 1994, RC-94-0271

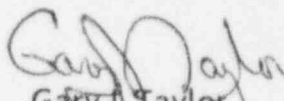

South Carolina Electric and Gas Company (SCE&G) is submitting an administrative change to the previously submitted Technical Specification (TS) change request dated October 17, 1994 (reference above). This supplement is to revise the bases page that is included in this change request and is a result of the issuance TS Amendment 118. This proposed change has been evaluated and determined to be non-significant and administrative in nature.

This submittal does not affect the previously submitted Safety Evaluation or No Significant Hazards Determination. This submittal does not supersede the previous submittal (referenced above). To prevent confusion, all of the revised TS pages are included but only Bases page 3/4 3-3 is affected by this administrative change.

I declare that the statements and matters set forth herein are true and correct to the best of my knowledge, information, and belief.

Should you have any questions regarding this supplement to the Relocation of Seismic Monitoring Instrumentation TS change request, please call Mr. Philip Rose at (803) 345-4052 at your convenience.

Very truly yours,

Gary J. Taylor
