

November 14, 1994

Dear Sir;

I demand the immediate shutdown of all reactors using Thermo-Lag until the material is removed and replaced. Thermo-Lag fails to meet the NRC's own regulations about combustibility and it should not be up to the individual utility whether they use Thermo-Lag. The company which produces Thermo-Lag was indicted for defrauding the government and the utilities. I demand that this letter be treated as a show cause petition under 10 CFR 2.206.

Sincerely,

Bob DeBolt
