Dear Monsieur Fermandjian:

Jean

Enclosed for your review is the draft of the State-of-the-Art Report on Nuclear Aerosols. Final revisions will be completed at our meeting in Bologna, September 20-22, 1978.

The report is of high quality as a result of the excellent technical contributions and cooperation and the special, timely efforts of the Experts Group.

In particular, I am indebted to the Chapter Coordinators, who helped to make my task much easier. Editorial consultation by Jim Gieseke was also invaluable.

If we continue this fine spirit of cooperation and team work at the Bologna meeting we will produce a report we can be proud of.

I look forward to seeing you in Bologna.

Sincerely,

mel

Mel Silberberg, Chairman
CSNI Group of Aerosol Experts
