

March 9, 1979

Dr. Sam A. Harbison  
Nuclear Installations Inspectorate  
Room 455  
Thames House North  
Millbank, London SW1P 4QL

Dear Dr. Harbison:

I am pleased to transmit copies of the revisions to the Draft State-of-the-Art Report on Nuclear Aerosols in Reactor Safety. Only those pages which contain revisions are enclosed. Please review these revisions in preparation for the April 3 meeting in Paris. I believe we can finalize the draft report rather quickly. If sufficient time remains on April 3 then we can proceed with the business which is now scheduled for April 5. In this way it would be possible to close the meeting by lunch on April 5.

In order to expedite our work on the report I would appreciate your consideration of the following items:

1. Please provide the names of other individuals from your organizations who have contributed significantly to the report and hence should be cited or acknowledged.
2. Please provide the best available copy for the Figures in the Appendix submitted previously for the initial draft. (These should be provided by the appropriate Chapter Coordinator).

Once again let me thank you for your continuing cooperation and effort towards the development of a very important, high quality contribution to the field of reactor safety. I look forward to seeing you in Paris.

Best regards.
