MEMORANDUM FOR: Robert J. Bosnak, Chief
Mechanical Engineering Branch
Division of Systems Integration

FROM: Cecil O. Thomas, Chief
Standardization & Special Projects Branch
Division of Licensing

SUBJECT: REVIEW SCHEDULE ON B&W TOPICAL REPORT BAW-10140-P,
"VIBRATION ANALYSIS, MEASUREMENT AND INSPECTION
PROGRAMS FOR PROTOTYPE REACTOR INTERVALS FOR B&W's
205 FUEL ASSEMBLY PLANTS"

- REFERENCES:
- (1) R. J. Bosnak's March 23, 1979 memorandum to S. A. Varga
Re: Review Schedule on B&W Topical Report (copy attached)
 - (2) James H. Taylor's February 1, 1979 letter to S. A. Varga
Re: BAW-10140 (copy attached)

During a recent review of the B&W Topical Report Program with Thomas Baldwin of B&W, SSPB was informed that B&W anticipates an early completion of this review. SSPB's records show B&W transmitted the subject report on February 1, 1979 (reference 2) as documentation of B&W's compliance with Regulatory Guide 1.20, Revision 2. B&W asked for NRC review of the subject report.

SSPB's records include a TAC number 5157 prepared on form 197, 3/12/79.

We have no record of the completion of this review. Would you please review your records on this matter and, if your review was completed and an SER exists, please send us a copy with any associated transmittal letter. If the review is not completed, would you please schedule the completion of the review and provide me with your estimated completion date. I have provided a new TAC assignment form 197 (attached).
