and Safeguards, NMSS

SUBJECT: TRIP REPORT TO CABOT (TAC NO. L10014)

On November 9, 1994, a site visit was made to the Cabot Boyertown facility to discuss the renewal of Materials License SMB-920. At this time, Mr. McKnight from SAIC specifically discussed chemical safety with Mr. Campetilli and Mr. Engle of the Cabot staff. From these discussions, the following points were noted:

1. The licensee is in the process of developing a Process Management Program for implementing a Chemical Safety Program (CSP).
2. Personnel turnover at the plant has delayed the schedule for conducting the hazard assessment.
3. The CSP is in various stages of completion, ranging from need for formal written procedures to development of additional information and programs.

cc: Mr. William Gannon
Radiation Safety Officer
Cabot Corporation
County Line Road
Boyertown, Pennsylvania 19512-1608
