County City Building, Room 1316  
ATTN: Bob Allen, Manager  
Bureau of Public Construction  
227 W. Jefferson Boulevard  
South Bend, IN 46601

Dear Mr. Allen:

This refers to the routine safety inspection conducted by Robert Gattone of this office on October 27, 1994, of activities authorized by NRC Byproduct Material License No. 13-15243-03, and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities were found to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required. Violation No. 4. is a repeat item. In your response to this violation, please describe why your proposed corrective action is expected to be more successful in preventing future or similar violations than the corrective action taken in the past.

Notwithstanding the guidance contained in 10 CFR Part 2, Appendix C, Section VII.B.1., of the NRC's Enforcement Policy, which allows the NRC to use discretion and not cite certain Severity Level V violations, we are issuing Violation No. 4 of the enclosed Notice. Adequate corrective actions were not available at the time of the inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
