FREEDOM OF INFORMATION
ACT REQUEST

August 1, 1983

FOIA-83-441
Rec'd 8-3-83

Dear Mr. Felton:

I am a reporter with The Standard-Times of New Bedford, Mass. and I am requesting under the Freedom of Information Act material pertaining to the Pilgrim I Nuclear Power Plant in Plymouth, Ma.

Specifically, I would appreciate receiving information relative to the management report conducted by the NRC last year after which a \$550,000 fine was assessed by the NRC.

Documents I have an interest in include: the report itself and any other material that relates to that report, that is, the official response by Boston Edison and any followup correspondence by the NRC; reports during the past year by the NRC as to Edison's actions to correct faults found by the NRC, and any correspondence by the NRC relative to Edison's actions.

I would also have an interest in any reports, documents or correspondence by the NRC evaluating the Pilgrim power plant's operation during the years it has been in service. In order to put that performance into some perspective, I would also like to receive any information on file with the NRC that evaluates the Pilgrim plant in relation to other nuclear power plants in the United States.

Finally, I would also appreciate a listing of any and all shutdowns of the plant that the NRC is aware of and the reason for that shutdown as well as the duration of the shutdown.

Mr. Felton/Page two

If you have any suggestions or recommendations on other material you feel would be relevant to a story on the overall performance of the Pilgrim plant, please feel free to include that material as well.

Thank you in advance for your attention to this request.

Sincerely,

Ernest J. Corrigan
