MEMORANDUM FOR: M. Wayne Hodges, Director  
 Division of Systems Research  
 Office of Nuclear Regulatory Research

THRU: Farouk Eltawila, Chief /s/ F. Eltawila  
 Reactor and Plant Systems Branch /s/ TLK  
 Division of Systems Research

FROM: Donald E. Carlson /s/ D. Carlson  
 Reactor and Plant Systems Branch  
 Division of Systems Research

SUBJECT: REQUEST FOR NO-COST EXTENSION OF INEL JOB CODE L2547

This is to request a no-cost extension of INEL Job Code L2547, "SPES Test Analysis." The estimated period of performance should be extended through December 31, 1995.

The extension is necessitated by delays that INEL has encountered in preparing a RELAP5 input deck of the SPES-2 facility. The delays have arisen primarily from the applicant's failure to provide timely and adequate facility information needed for completing the deck. As a consequence, INEL has lost considerable time in preparing a series of Requests for Additional Information (RAIs) and awaiting responses from the applicant. In several instances, the applicant's RAI responses provided only part of the needed information and follow-up RAIs had to be issued.

The last Form-189 proposal is attached along with a note providing further background information.
