Docket Nos. 50-277  
50-278  
License Nos. DPR-44  
DPR-56

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

Subject: Peach Bottom Atomic Power Station, Units 2 and 3  
Technical Specifications Change Request No. 94-15

Reference: Letter G. A. Hunger, Jr. to U. S. Nuclear Regulatory Commission,  
dated October 25, 1994

Dear Sir:

In the referenced letter, PECO Energy Company (PECO Energy) submitted an Exigent Technical Specifications Change Request (TSCR) No. 94-15 to request a change to the testing requirements of the High Pressure Coolant Injection System (HPCI). Exigent processing of this TSCR was requested because we wanted to quickly clarify an ambiguous statement in the PBAPS TS.

The attached TS are ready for publication, and are the same as the marked-up pages submitted in the referenced letter, with one minor clarification. The proposed Bases on TS page 141 have been modified to accurately reference the associated surveillance requirement. Because of this clarification, we are submitting these pages under oath or affirmation. This clarification does not affect the finding of no significant hazards that was submitted in the referenced letter.

If you have any questions please feel free to contact us.

Very truly yours,

G. A. Hunger, Jr.,  
Director - Licensing

Enclosures: Affidavit, Attachment 1
