Attn: D.G. Wiedeman, Chief Materials Radiation Protection, Section I

Dear Sir:

This is in reference to the safety inspection conducted by Mr. D.R. Gibbons, at Twin Ports Testing Laboratory, 1301 North 3rd Street, Superior, Wisconsin, on September 27-29, 1983.

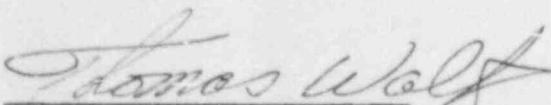

During Mr. Gibbons' inspection, a non compliance with NRC requirements 10 CFR 71.5 (a) was found.

Transporting licensed material to various areas in the states of; Minnesota, North Dakota and Wisconsin, without the proper specification markings on the outside surface of the shipping containers.

To correct this level IV violation, a yellow II shipping label has been attached to the outside surface of each container. Also on the top of the containers has been stenciled the wording, "Inside package complies with prescribed specifications."

We hope these corrections will meet with your approval. If there is any problem or questions, please contact us.

Thank you,

Thomas Walk, Safety Officer
Twin Ports Testing, Inc.
