

DOCKET NUMBER
PROPOSED RULE **PR 20 + d**
(59FR43200)

DOCKETED
mid-island radiation alert

'94 DEC 19 P 2
25 Sparrow Lane
Huntington, N. Y. 11743

OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH
December 15, 1994

29

Nuclear Regulatory Commission
Attention: Docketing and Service
Washington, D. C. 20555

Gentlemen:

We are strongly opposed to your Enhanced Rulemaking on Residual Radiation (ERORR). A radiological standard of 100 millirems per year for decommissioned facilities represents a threat to public health. No radiation above background levels should be allowed from such facilities.

Totally unacceptable is the recycling of radioactive materials. All radioactive waste must be safely isolated from the environment.

The toll of cancer incidence in the U. S., which has already reached one million per year, must not be increased at the behest of the nuclear industry.

Sincerely,

Miriam Goodman
Coordinator
