Washington, DC 20555

Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION
DOCKET NO. 50/395
OPERATING LICENSE NO NPF-12
TECHNICAL SPECIFICATION CHANGE - TSP 900004-1
CERTIFICATION OF TRAINING PROGRAMS

Reference: SCE&G letter to NRC dated December 7, 1990,
Same subject as above

South Carolina Electric and Gas Company (SCE&G) is submitting a revised amendment request to supplement its submittal of December 7, 1990, "Certification of Training Programs."

This revision amends the previously proposed TS to include the requirements of Regulatory Guide (RG) 1.8, Revision 2, April 1987, in TS 6.3 and 6.4. This revision also differentiates the training requirements for unit licensed and non-licensed staff.

This revision to the original submittal of December 7, 1990, has no significant impact on the safety evaluation or the no significant hazards determination, except for adding the reference to RG 1.8, Revision 2.

This proposed Technical Specification change has been reviewed and approved by the Plant Safety Review Committee and the Nuclear Safety Review Committee.

I declare that the statements and matters set forth herein are true and correct to the best of my knowledge, information and belief.

Should you have any questions concerning this issue, please call Mr. Manuel W. Gutierrez at (803) 345-4392, at your convenience.

Very truly yours,

John L. Skolds
