Dear Yvonne

Attached are three documents which you requested at our May 29, 1991 meeting for movement of sludge between the ponds. The documents are:

Safety Analysis Report- Inter-Pond Sludge & Contaminated Soil Mobilization
Radiological Pathway Analysis of Residual Activity Below Closure Cells
Soil Sampling Plan for Closure Cells

The first report listed is the SAR for the process for moving the sludge from the V-1 and Celite ponds to the deepwell pond and for handling the excavated soil in preparation for installing the liner.

The second report is the evaluation on ground water assuming that 35 pCi/g residual contamination is left in the soil.

The third report is the sampling plan for the closure cells to assure that the pond has been decontaminated.

If you have any questions please contact me at (419)226-1289

Sincerely,

K.C. Wardwell
Project Manager
